

Description

This high efficiency parabolic reflector antenna makes use of the patented Stinger® slip on mounting method, thus reducing mounting cost and time of install. The low profile aesthetics of this design reduce visual impacts and windloading. The low loss passive coupling system ensures high performance without sacrificing SM warranty.

Applications

- Extend your range to 4 miles
- Boost signal levels for marginal customers
- Speed up your installs
- Lowers jitter

Features

- Slip on an extra 10 dB @ 5.8 GHz
- Narrows the pattern to 10

Specifications

Electrical Specifications

Frequency	5.725 – 5.840 Ghz
Gain	10-17 dBi @ 5.7 Ghz
Beamwidth (3dB)	11 degrees
F/B Ratio	>20 dB
Cross Pol Reject	NA

Mechanical Specifications

Wind Load	28 lbs @ 100 MPH
Height	10.25 inches
Width	10.25 inches
Weight	11 oz (0.31kg)
Polarization	No Change

Antenna Gain Patterns

5.7 Trango Stinger
